

Revolution in liquid ice production

# FB 300 Liquid ice Mixer

**Formax introduces a new generation of liquid ice generators based on a wellknown formula of mixing ice and brine.**

The new computer aided process-control provides constant high-quality ice production. The easy-to-use control panel makes the machine simple to operate. The operator can select from a number of pre-programmed features, as well as create a new formula. The control computer can be linked to any standard PC net.

**Capacity of up to 10 tons per hour of liquid ice.**

**FORMAX**

*Food Processing Lines*

# Total ice system for fish, poultry and meat processors

- Brine Generators
- Ice storage tanks in various sizes, both vertical and horizontal.
- Conventional ice storage

Brine Generators

Storage Tank

## Main benefits of the system

- Fast chilling of product / 10 times faster
- Very small ice crystals
- Self-draining ice
- Easy operation
- Low operating cost
- Fully automatic

## Technical specification

Capacity:	10 tons/hour
Temp. range:	0 to - 15°C
Energy consumption:	0.8 kWh/ton
Material:	Stainless steel ANSI 316L
Volume:	400 Litres
Net weight:	350 kg
Voltage:	380/440
Frequency:	50/60
Consumption:	7.5 kW

# FORMAX
